

# **Elevate your mood with these jewelry trends**

This year, life has thrown a wrench in our paths, and most of us have had our share of fears and anxieties nibbling away at our days. We try to stay positive, but this can prove challenging. How can we feel better and happier? Look no further than your fingers, neck, and ears – and encourage your customers to do the same.

We can delight in mood-lifting jewelry. Color holds a powerful sway over our emotions, so choose colorful gemstones that calm or energize us, as the case may be. Then we look for a deeply felt symbol that reflects our source of strength. As our eyes return to these pieces during the day, we'll remember that we can find joy in unexpected situations and that we can tap vast stores of strength.

## **Joyful Colors**

Colorful gemstones may not be magic, but they have a magical effect on us. We love the sunny warmth of Citrine, Turquoise's calm tranquility, and Amethyst's alluring hues. Pair them with lusciously designed jewelry in 14K white, yellow and rose, and you'll feel your happiness barometer rise with your smiles.

## Symbolic Touchstones

When we lose sight of the forest for the trees, spiritual and symbolic jewelry brings life back into perspective, boosting our patience and awareness. Whether it's an Eastern belief, a celestial reminder, a treasured emotion, or symbol of protection, each can re-orient how we see our day, and remind us to reach out to others.
