BAZAAR

Have you peeked inside this month's [Elle](#), [Marie Claire](#), or [Harper's Bazaar](#) magazines? You may have seen one of our fave looks from the Utility Collection, these fun and flexible [mobile earrings](#).

Modern Movement

From brunch with the girls to a night out on the town, a cocktail dinner, or a weekend spent at home, the mobile earrings are versatile enough to be worn anywhere and for anything.

Your customers can wear this playful and luxurious style as a solitary statement piece or wear it paired with a complementary **#NeckMess**. With a single whip of their head, they'll steal a second glance from everyone around.

Behind the Design

Collaboration is at the heart of [302 Fine Jewelry](#). Our in-house fashion experts and design team frequently meet up to discuss new and existing designs, and this is how the mobile earrings were brought to life.

Our jewelry team identified a need within the [Utility Collection](#) for a head-turning, movable style. After weeks of browsing, picking, and crafting a prototype from Stuller's wide assortment of jewelry findings, the 302 design team got to work creating the fully functional earrings.

Now this design has proven itself a standout style both inside and outside of Stuller. Grab your pair today in one of five metal qualities (silver, platinum, and 14-karat white, rose, and yellow gold) to have them ready for your fashion-savvy customers.
